Photo Gallery

Putting It into Practice

- Given the HTML code and the CSS code, can you:

  - change the background-image of an element?

  - change the content of an element?

Example

- Gallery Homework

background-image

- The background-image is an option for including graphics without using the img tag

- You should set a background-color as well in case the url isn't valid

```
background-image: url("mypPic.jpg");
background-color: #CCEECC;
```

Element text

- We have discussed two different ways to change the content
  - document.write()
  - innerHTML

Tips

- The code should actually be quite short

- You will need to think about how to incorporate the quotes

- Remember, you use + to concatenate Strings
